Session 10: Showtime

Question: Can you explain it like an analyst?

Presentation scoring (each criterion 1 to 4)

Criterion	1	2	3	4
Clarity	The finding is not stated.	The finding appears late or is unclear.	The finding is stated first and is mostly clear.	The finding is stated first, in one sentence, and everything supports it.
Evidence	No numbers or chart.	Numbers are given but not linked to the finding.	One chart or number clearly supports the finding.	The evidence is checked, simple, and answers the question directly.
Recommendation	There is none.	It is vague, like do better.	A clear action.	A clear action, with who and why, linked to the evidence.
Delivery	Reads the slides, no structure.	Some structure, but rushed or too long.	Clear structure and on time.	Clear structure, on time, calm pace, numbers said simply.

Questions to expect

- Walk me through your project in 2 minutes.
- Why did you remove those rows?
- What would you do with more time?
- How did you check your numbers?

Your 5 minutes

1 minute question and context. 2 minutes finding and evidence. 1 minute recommendation. 1 minute spare. Answer first. Say numbers simply.
