Session 9: Polish and publish

Question: Can you say your finding in three sentences?

Concepts

Concept	In daily life	In Excel	The limit
Three sentences	A short message to a manager	A summary line	Answer first, then evidence, then recommendation
README	The front page of your project	A cover sheet	It must credit the data
Commit	Saving a version with a note	Save As	Write a short note about what changed

Code patterns

```
# My project title
**Question:** ...
**Data:** Chen, D. (2012). Online Retail II [Dataset]. UCI Machine Learning Repository.
https://doi.org/10.24432/C5CG6D. CC BY 4.0.
**Finding:** ...
**How to run:** Open the notebook in Colab and run the cells from the top.
```

Three common errors

Error	What to do
The repository is private	Settings, then change visibility to public. Check in a private window.
README without the data credit	Add the citation. The licence requires it.
Slides full of text	One chart, one big number, one sentence.

Exercises and expected answers

Exercise	Expected
Predict: 671 of 3066 products are class A. About 1 in how many? Guess first.	Guess first, then run it to check
Fill in: Say the total revenue simply, in millions with 1 decimal.	About 1.9 million pounds
Fix it: The month labels are dates as text and overlap. Make the chart readable: add plt.xticks(rotation=45) and a finding title.	The cell runs without an error
Write it: The UK share of revenue, said simply as a whole percent.	About 85% of revenue is from the UK
Write it: Three sentences for the ABC finding, printed with f-strings. Answer first.	the first line is About 1 in 5 products bring 80% of revenue.
Your finding in one sentence, answer first	Your own
Your recommendation in one sentence	Your own
The repository link opens in a private window	Yes

GitHub steps (you click every button)

Step	What to do
1	In Colab: File > Save a copy in GitHub
2	On github.com: Add file > Create new file, name it README.md
3	Write the README and click Commit changes
4	Open the link in a private window
